GRAND CENTRAL

a 5c Dividend Tomorrow.

E. & F. MINES PROVE UP BIG

SNOWSTORM IS A BLESSING TO MILL OPERATORS.

As it was anticipated they would do the directors of the Grand Centra company met in Provo Monday even ing and ordered the payment of anothe dividend of 5 cents a share, or \$12,500 the distribution to be made tomorrow. The news was brought up by General Manager C. E. Loose yesterday morning. While the stock of the Grand Central Central Conference of the Grand Central C tral company refuses to strengther since dividends were resumed last month, nothing but good reports come from the mine where, it is stated, great bodies of ore are being developed and the dividends earned without resorting

to stoping.

It is not easy to account for the weakness of the company's shares under these conditions, but the claim is made in some quarters that it is the doubt surrounding the outcome of the litigation with the Mammoth company which is responsible for the low price of the stock. As a decision affecting of the stock. As a decision affecting the cases pending is expected to be handed down during the present month, it is claimed that the stock will not be strong until after it is rendered.

E. & F. MINES ARE BIG. Ore Bodies Now Opened 700 Fee Deep-Transportation Needed.

Joe S. Free, superintendent of the E & F. company's mines at Pioche, Nev. is up from camp for the first time is many months. He will spend Christmas at home and then return to camp to continue the good work he has been doing during the year.

A day or two ago Colonel A. C. Ellis

the chief owner of the property, stated that the mine's worth and permanency had been firmly and most satisfactorily established, though it had taken a great deal of time and a large sum of

Superintendent Free reports that con-Superintendent Free reports that connections have now been made with the ore bodies through the long working tunnel and declares that if the camp was afforded connection with the San Pedro, a branch line that is badly needed and the building of which is now amply justified, the E. & F. property could and would make a record for production that would astonish the naduction that would astonish the natives. The ore-bearing channels have now been opened and the ore bodies proven continuous for 700 feet down om the grass roots, and the property located at Bingham or one of the near-by camps, would now be attract-ing wide attention. Ores which in the mear-by camps would be counted as extremely high grade have to be held back at Pioche because of the expensive wagon and railroad hauls. But the merits of the camp, he says, must soon result in the extension of the San Pedro, and with that done, he predicts a genuine boom for the old bonanza dis-

STORM HAILED WITH DELIGHT. Had It Held Off Much Longer Ore Producers Would Have Suffered.

A message from Manager Tony Jaobson of the Columbus Consolidated to Secretary A. E. Snow yesterday after-noon brought the information from Alta that the mill was grinding a steadily and doing better work than ever. Two or three days ago the severe cold weather and lack of snow on the ground resulted in the contraction of the water main which supplies the energy to operate the company's power plant to such an extent that one of the joints parted. Repairs were quickly made, however, and now everything

earnest at camp and Manager Jacobson was exulting in consequence. Continued cold weather and no snow meant a material diminishing of the water ing what kind of damage to the long water line pipe to the power plant. Now that the snow has come all danger is past, either from frost or lack

ment is not the only one that has been holding its breath during the past few weeks in fear of disaster from cold weather and delayed storms. Nearly every camp in the state has had its troubles in this respect and there will be rejoicing at Park City, Bingham, Tintic, Gold Mountain and elsewhere that the spell of more than six months without hardly a drop of rain or spatering of snow has at last been broken Where great milling plants are in operation lack of precipitation and the frost are conditions that are little short of alarming, when it is necessary t confront them for even limited period beyond the normal, and it can be truth fully said that the storm which set i yesterday, and which appeared to b general throughout the mining cam regions, came in the nick of time. An other week or two must have witnessed an almost entire suspension of milling operations and a consequent trimmin of the output of the mines of the The storm makes everything safe an mining operators happy. TONOPAH-GOLDFIELD SHIPMEN

Over 1,400 Tons of Ore Billed Or Last Week.

The ore shipments over the Tonopah railroad this week, says the Miner, agregated 1,406 tons, of which 305 tons came from Goldfield. The shipments are divided as follows:

From Tonopah—Tonopah company, 847 tons; Belmont, 135 tons; Montana-Tonopah, 59 tons; Tonopah Extension, 60 tons.

From Goldfield-Combination, 58 tons; 63 tons; Florence, 166 tons; Janu Jumbo, 63 tons; Florence, 166 tons; January, 18 tons.
On account of the badly congested condition of Tonopah and Goldfield freight at Reno and Mound House, the Southern Pacific company has announced that until the congestion is relieved it will receive ano freight for these two camps except perishable goods and subsistence supplies. It is probable that under this order no heavy freight will be accepted for Tonopah and Goldfield before the first of January. for Tonopah an

MINING STOCK EXCHANGE. Market Conditions Are Good-Ontario Makes a Sale.

rio Makes a Sale.

The mining share market exhibited good form again yesterday and trading was fairly active. During the day a total of 31.740 shares of stock, with a selling value of \$8,345.25, changed hands.
Daly sold 200 shares at \$2.715, Daly-Judge dropped fifty-five shares at \$2.25, while Ontarlo, which has been on a side shelf for a long time, came out with 100 shares at \$4. Victoria was fively at \$2.25 to \$2.20 for board lots, while small packages were secured at a little less.

May Day was a little weaker and closed

on sales at 22% cents. New York was in charp demand and from 23½ cents it moved up to 24¼ cents and closed at 24 TO PAY \$12,500

| Conts. Lower Mammoth did a little business in the morning at 12½ to 13 cents, while Little Chief, Joe Bowers and Tetro were steady. Star Consolidated was fractionally lower, while Yankee was strong at 37½ to 38 cents.

| Following is the list of final quotations and record of sales made:

NEW GOLD CAMPS.

Three Districts South of Goldfield

Attracting Attention. Quartzite Mountain, Granite Mountain and Cane's Springs, which appear to be names applied to the same general neighnames applied to the same general neighborhood, lying from six to twelve miles south of Goldfield, is attracting numbers of gold seekers, says the Goldfield Review. In a striking way the country resembles the Goldfield district and some of the ore that has been exhibited bears the same characteristics. All the outcroppings carry gold, thus indicating that values will be found with development. As yet little work has been conso that the real worth of the countries till an unknown quantity. The groundant has all been taken up, however, and call of the many locators there will without doubt be some who will make good showings.

men to do some sinking on one of the holdings.

MAMMOTH MAKING RECORD. Has Paid \$120,000 This Year and

Mine Is Growing Better. The Mammoth Mining company will pay its dividend of \$20,000 tomorrow and round out a total for the year, or rather six months, of \$120,000. Through long-pending litigation with a neighbor, company had previous to six months ago gone nearly three years without being able to share the profits of the mine with the stockholders. To say that it was entirely due to litigation is not altogether the case, however, as the company's dissatisfaction with the treatment it was receiving at the hands of the smelter had something to

Ore and Bullion. Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$174,000, as follows: Silver, lead, gold and copper ores, \$59,300; base bullion, \$114,700.

Silver, 60% cents per ounce.
Copper (casting), 14% cents per pound.
Lead, in ore, \$2.50; New York, \$4.60 per 100 pounds. Metal Markets.

Mining Notes. Judge Henry Shields was down from Park City yesterday on mining business, the nature of which he was not willing to disclose.

C. O. Ellingwood, secretary of the West-ern Exploration company, left for a busi-ness trip to San Francisco Monday night. He will be gone about a week. The delinquent sale of Wabash is advertised for tomorrow. Very little, if any, stock will have to be sold, as the last assessment is practically all paid up.

F. A. Shirmer of the Boston Consolidated company's official household has sailed for London to attend the annual meeting of the corporation, which is to be held this week.

Manager George H. Dern of the Consolidated Mercur, who is in from camp, states that the run on tailings at the Manning mill has been discontinued for the season. Though it was late when the plant was put in operation, he says that it has carned good money. The final clean-up will be made a few days hence. Goldfield Review: Dan Croff brought in news of another good find of gold-bearing ore this morning from Lida. The strike was made by 0. F. Banta on ground on Lida Belle mountain, four miles west of Lida and two miles from the Blue Dick mine. Banta has opened up the ground for fourteen feet and uncovered a ledge from six to nine inches wide just beneath the surface that carries from \$45 to \$69 gold and 20 per cent lead.

Tonorah Mines.

ery, has been struck. It is said to assay upwards of \$1,900. This Sandstorm strike has awakened considerable interest in that locality, and many prospectors are trenching and sinking on the adjacent claims, with excellent prospects. A number of leases have changed hands this week at big figures.

FIVE BIG JUVENILE LINES. Wizard of Oz series, 5 titles, each

FARM OF A MISER. It Is Full of Gold, But Nobody Can

money could never be found, even by himself.

By careful computation of the prospective heirs, based to a large part on information as to the exact amounts that he had received from companies in royalties, it was found that within the last two years the old man had received in excess of \$30,600 from oil production alone, besides other sums which came from the sale of stock and farm produce. This sum is believed to be hidden in various places about the farm, but the most persistent search has failed to show more than \$250.

The attempt to have the old man declared of unsound mind failed because of the testimony of neighbors, who swore that he was not crazy, but just a little "queer." The farmer is stil receiving his royalties and hiding the money, nobody knows where.—Indianapolis Sentinel.

HATS CAUSE BALDNESS.

They Make the Scalp a Hothouse For Microbes.

(New York World.)

There is every reason to believe that primitive man had a thick and abundant head of hair, and that this natural clothing of the scalp is diminishing among covilized peoples, and will end by disappearing altogether, which would certainly not be advantageous from an aesthetic point of view. The cause of this disappearance of the hair, according to the doctors must be sought in the yeary conditions of salied for London to attend the annual meeting of the corporation, which is to be held this week.

D. C. Jackling, general manager of the Utah Copper company's properties, has returned from a short business trip to Colorado.

Twelve carloads of ore from Finit, four from Nevada, one from Fish Springs and one from Binsham were reported at the morning.

Within he next day or so the May Day company will swell its treasury to the tune of \$3,000 or more through the sale of six cars of ore more through the sale of six cars of ore more through the sale of six cars of ore from Pinits, four file pleaves for home again the morning to make out the checks for the company's Christmas present of \$100.

Frank M Taylor of the Taylor & Bruntion Sampling company is looked for between now and Christmas, but no word that one has been posted has yet reached here from headquarters in New York.

The Ploneer sampler yesterday reported four cars of ore from Tintic, two from Nevada and one from American Fork.

Silver was given another boost yester day, the metal being quoted in New York at 6% cents per ounce.

William H Alexander has purchased the seat of Ben D. Luce on the local mining exchange and applied for membership under it.

Manager George H. Dern of the Consolidated Mercur, who is in from camp, states that the run on tailings at the Manning mill has been discontinued for increase and the veilengt that it can exert only a consolidated Mercur, who is in from camp, states that the run on tailings at the Manning mill has been discontinued for increase of morning that it can exert only a consolidated Mercur, who is in from camp, states that the run on tailings at the Manning mill has been discontinued for increase of morning the policy of the company of the company is tooked for between now and Christmas, but no operation, he mental being quoted in New York at the condition of the policy of the condition of the condition of the policy of the condition of the conditio
